

HERA THE FUNCTIONAL BATH AND TOILET CHAIR

The Ergolet bath and toilet chair, with lift up arm rests, has been developed with the carer and user in mind. The tilt function is easily activated using the cable under the handle. The chair can be placed in any desirable position using the gas spring e.g. In a horizontal or tilt position.

An unique feature of the chair is the height adjustment which can be carried out without using tools. This adjustment is built into the tilt function.

The seat is of black PU foam material and is available in two versions, with or without the front opening. The back support, also of PU foam, is height adjustable for better comfort.

A foam cushioned neck support can be adjusted both in height and angle.

The foot supports are also height adjustable and foldable. High quality wheels with brakes are standard.

The toilet receptacle is integrated into the removable (clip on) seat and there are no irritating metal parts under the seat. This give extra space to place the chair over the toilet and also ensures easy cleaning.

The chassis is available in 100% stainless steel.
