

Flat Slide Sheets

Pair of Sheets - 55" Long x 32" Wide

- Easily reposition a patient in bed
- Effortlessly turn a resident in bed
- Multiple handles to assist in "No Lift" maneuvers

When needing to reposition a patient or resident in their bed, it is important to reduce the risk of injury to caregivers. Designed to easily assist in the repositioning process, the Flat Slide Sheets are made from a low friction nylon with a silicone coating. Caregivers can safely and quickly attend to the needs of their patients while reducing risk of back injury.

The Flat Slide Sheets are not meant to remain under the patient, as the friction free surface could cause unwanted repositioning.

Product Code: FLATCM

Patient Transfer Belt
